

HEALTH & SAFETY

Immunization Information

Parents when your child turns 11 years old they will need to update their immunizations.

Required shots are:

Tetanus = Tdap, & the Meningococcal = MCV4.

2nd Varicella shot should have been given, but if not will need the 2nd dose.

Parents are required to bring a copy to the school nurse after students receive their immunizations before student shot records can be updated.

Any student passing to 7th grade will need the same shots if they have not already gotten them.

Thank you,
Ms. Portillo, Losoya Nurse
